- Links to FAQ, Contact (Will be a panel), Member's Login
- This will be our reception page for all internet traffic
-

FAQ

[Return to Top](#)

-Contained within Index.php

-

Contact panel

[Return to Top](#)

- Contained in a separate php file, to be included in the footer of every page via php
- Gives contact info above the form
 - Sample phone number
 - To reach email address
 - Best to reach times
- Creates a form to submit a contact request
 - Checks to see if the person is logged in or not via php
 - If they are, auto-fill the form fields with known information
 - Else they'll have to type in the information
 - Fields:
 - Member Name (Hidden field, can be null)
 - First name (Input Text, Required)
 - Last name (Input Text, Required)
 - Email (Input Text, Required)
 - Reason for contact: (256 characters or less) (Text Area, Required)
 - Submitting form:
 - Queries the number of rows containing the to-be-reached email address that are not completed
 - If that number is above 5:
 - Guide the user to a page indicating we are still processing previous requests.
 - Else:
 - Insert a record into a table containing the:
 - AutoIncremented primary key
 - Completed?
 - Request Sent Timestamp
 - Is this person a member?
 - First name
 - Last name
 - Contact Email
 - Reason for Contact (500 characters or less)

Member's Login
